Savings calculated at \$0.20/Kwh, 12Hr/day, 365days/yr. Delamp T12 from 3 to 2 lamps generally requires a 2-ballast fixture. Brightness based on Seeable Lumens™ of M.E. Xtrabrite lamps versus Seeable Lumens™ of standard F40T12/CW Deluxe and F32T8/730. M.E. Xtrabrite™ lamps feature minimum 95% lumen maintenance. Shortlife lamps can lose up to 40% of their brightness. BRIGHTNESS AVG = midlife Seeable Lumens™. Seeable Lumens™ are based on accepted research from Lawrence Berkely Labs, CA and Dr. Sam Berman, understanding how scotopically-rich light increases seeability.
